POLARIS™
NANOSHIELD

Caravan / Motorhome *Paint Protection
Interior Protection*

www.mypolaris.com.au

Why do I need paint protection?

Just like a freshly-cut apple turns brown and a copper coin suddenly turns green - your caravan/motorhome paintwork will eventually look dull and powdery.

Since the outer-most layers of paint are constantly exposed to air and water - oxygen molecules in the air will over time start reacting with the paint.

This is oxidation and is a problem for every caravan/motorhome owner.

The way to keep your caravan/motorhome like new with a lasting mirror-shine.

POLARIS NANOSHIELD repels water, oil and dirt etc - using hydrophobic and oleophobic nano-technology.

Protects against oxidation. Thus your vehicle, boat, aircraft, caravan, motorhome's exterior surfaces will remain clean and shining longer with less washing and retains that brand new showroom mirror shine.

This is why it is recommended to have **POLARIS NANOSHIELD** paint-protection - using nano-technology which provides an invisible coating to your caravan/motorhome paintwork to prevent oxidation and deterioration.

The Protection and Preservation of the interior fabric and carpets.

POLARIS NANOSHIELD Fabric Protection will keep your interior clean from spills like food, coffee etc. that would otherwise stain.

Also available in the Polaris Nanoshield range:

Windscreen & Glass Protection

Better visibility - repels water and grime.

Leather Protection

Keeps your leather soft and protected

Polaris Stoneguard

The Invisible Car Bra
Protects against Stonechips
